

# INXScreen™ 940LED-LM

Vivid Color for Plastic Packaging

Vivid color, strong durability, and reliable adhesion define this low migration ink for baby bottles, drink bottles, and other sensitive packaging. Designed to protect both products and brands, it meets global safety and compliance standards, giving converters confidence at every stage. Optimized for LED and UV curing, it delivers high reactivity, smooth flow, brilliant opacity, and a high-gloss finish—without the need for thermal post-treatment. Free from harmful substances and made with sustainable raw materials, it is low-odor, eco-friendly, and built to support safe, standout packaging.

## Product Features

Engineered for reliable performance, this ink delivers consistent quality and durability across demanding plastic packaging applications.

- Brilliant opacity and high-gloss finish
- Strong adhesion on PP, PE, and polyolefins
- Fast curing with LED and UV systems
- Excellent flow and print consistency
- Resistant to solvents, water, and heat
- Eliminates thermal post-treatment steps

## Safety & Compliance Benefits

Formulated to meet strict global standards, this ink ensures safe, sustainable packaging while reducing harmful substances and supporting compliance worldwide.

- Low migration for baby and drink bottles
- Meets Nestlé packaging ink guidance
- Certified to EuPIA and Swiss EDI standards
- Free from ITX, BPA, and benzophenone
- Barium-free, low-odor, and eco-friendly
- Safe solution for consumer-ready packaging
